

# IMPORTANT NOTICE

## QUIK ADJUST PIN INSTRUCTIONS

P/N - 360205

Please install enclosed  
decals on top of  
stems.

**PRESS PLUNGER TO RELEASE LOCK  
FOR INSERTING AND REMOVING PIN.**

In normal field working conditions fine dust can enter the area where the locking balls are located (at the bottom of the pin) causing the plunger to stick. Moving the plunger in and out, tapping on a hard surface, or blowing compressed air on the locking balls with the plunger depressed will free up the plunger.

**Important -**

**When using the Quik Adjust Pin -be sure the plunger completely releases and balls are firmly positioned in holes. Failure to do this could result in losing stem and discs.**
